

BANK LOG TO BTC (REVOLUT METHOD)

Steps

Step 1:

Get a 911 Socks 5 from 911.re if you don't have one as a VPN wouldn't be effective and could cause you to get locked out of your bank log.

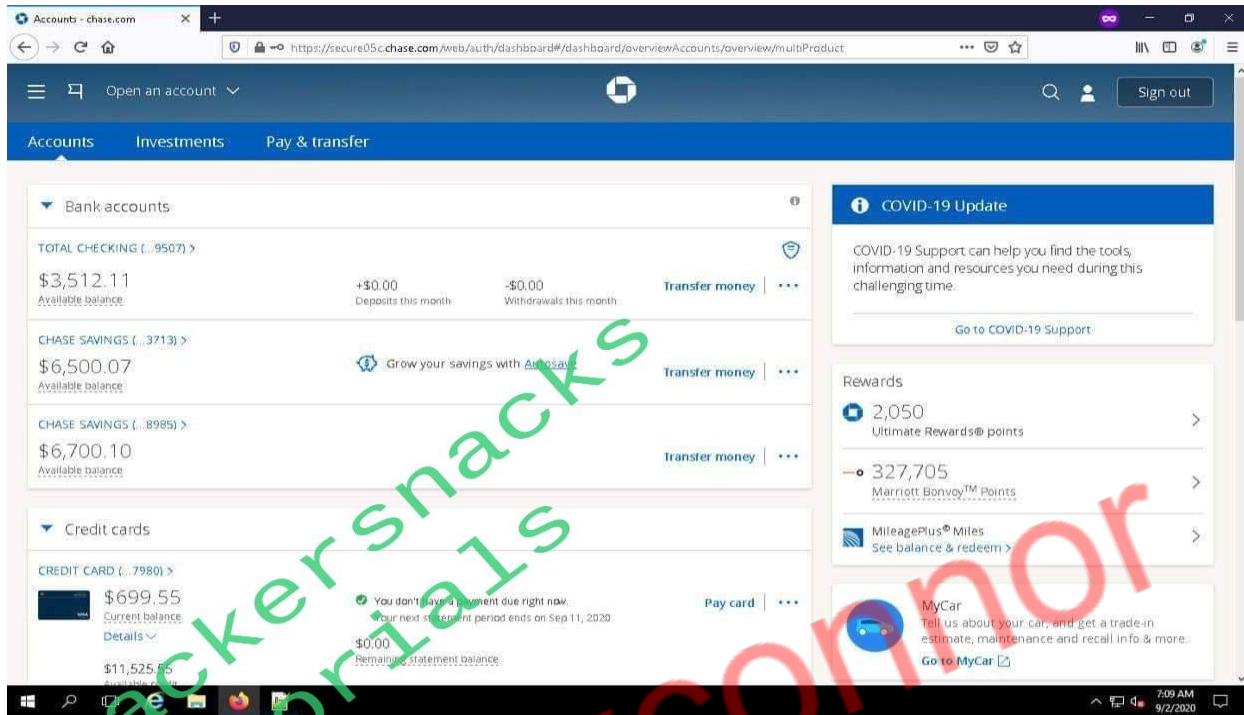

It would cost you \$28 to get 150 proxies.

Step 2:

Buy a bank log with email access attached.

You will need the email access to be able to successfully log into the bank account.

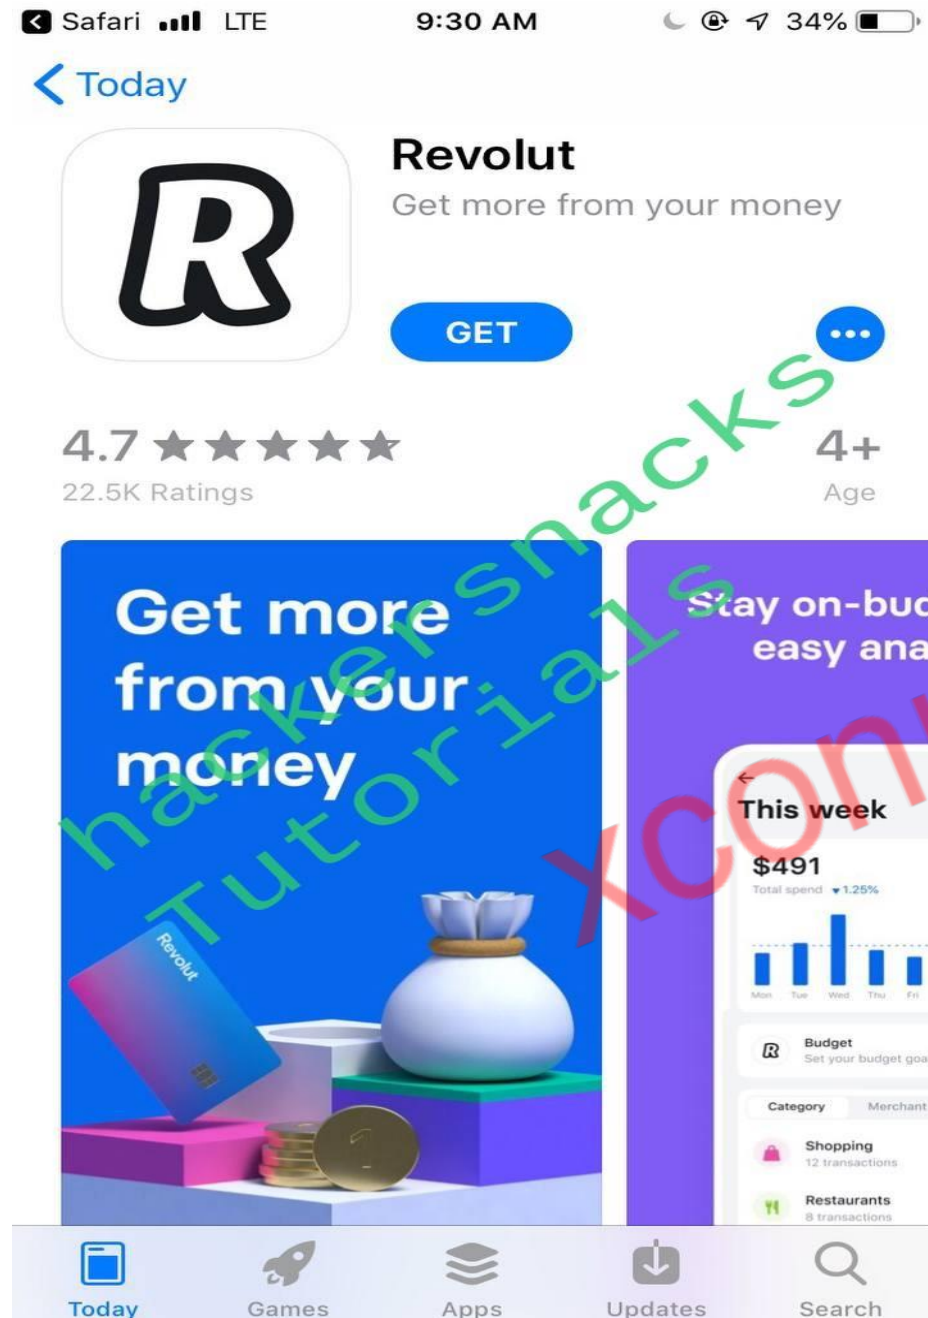

Step 3:

Get your client to open and verify Revolut app or buy fullz from whatever you get em

e.g ssndob.org

You will be give an account number and routing number to make bank wire transfer.

Step 4:

Get all the details needed for the wire transfer from revolut app and then head over to your bank log.

Connect your 911 socks to the IP or Zipcode of the bank log.

Log into the bank log.

Step 5:

Go to the home screen of the Revolut app.

Go to the “Accounts” tab of the app.

Next, select the currency you would like to add to your Revolut account from the drop-down list.

Tap on the three dots (...) next to 'Send' and choose 'Details'.

You can transfer money from an external bank account to Revolut by inputting your Revolut account and routing numbers/BIC code.

Each bank is different, but here are the general steps:

- Log into the external banking site
- Select external transfers
- Add your Revolut account and routing numbers details

If the bank asks for account type, you should select “checking”.

From there, the bank may require that you make two small deposits into your Revolut account.

You can make deposits of \$200 and \$250 first so they can confirm your account.

It can take up to three business days for the deposits to show up in your Revolut account.

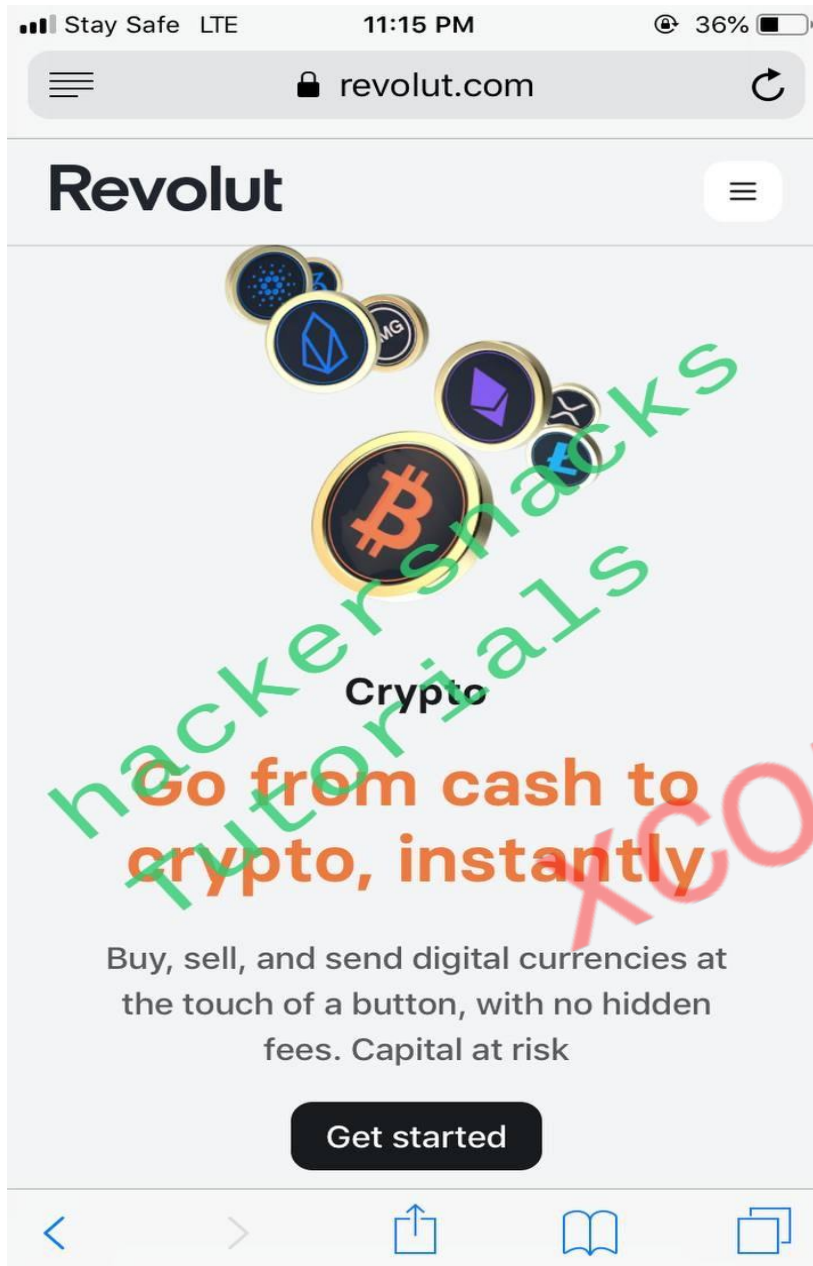

Once the deposits arrive in your Revolut account you can go on to load larger amounts like \$2k to \$4k

Revolut can also be used to load from UK bank logs. Hence their GBP and EUR currency options.

Step 6:

Once you have successfully loaded the Revolut account with funds from the bank log.

You can easily buy BTC right from the Revolut app and send it to any other wallet of your choice.

You can repeat this process with more bank logs.

Enjoy.
