

FREE VPNS ON ANDROID, IPHONE AND PC.

Some of these free vpns are actually stronger than the paid vpn;

For example windscribe vpn is stronger than nordvpn on pc, and can even bypass 2fa verification of some logins, also snap vpn is stronger than windscribe on android device, but windscribe is stronger on pc than it. To make this tut simple, we divide it into 3;

- free vpns on android
- free vpns on iphone
- free vpns on computer/pc.

DIFFERENCE BETWEEN VPN AND SOCKS5

- Vpns are mostly used for phones whilst socks on pc
- Vpn connect to country ip whilst socks connect to state ip
- Socks is faster than vpn and more secure
- If you doing a job which requires just changing/hiding your ip,

YOU CAN USE A VPN. HOWEVER IF YOU DOING A JOB WHERE YOU NEED TO BE IN THE SAME STATE AS THE CLIENT, THEN SOCKS IS THE BEST

- Jobs like mobile deposit,ach transfer,direct deposit,bill pay can Be done on vpn but jobs like online shop carding, wire Tranfer,money remittance(wu,remmit) will require socks
- Logging into emails too will require socks of the same state or you might face extra verification on the email.
- You can use a socks or vpn alone, or add any of them to rdp to make your ip undetectable.

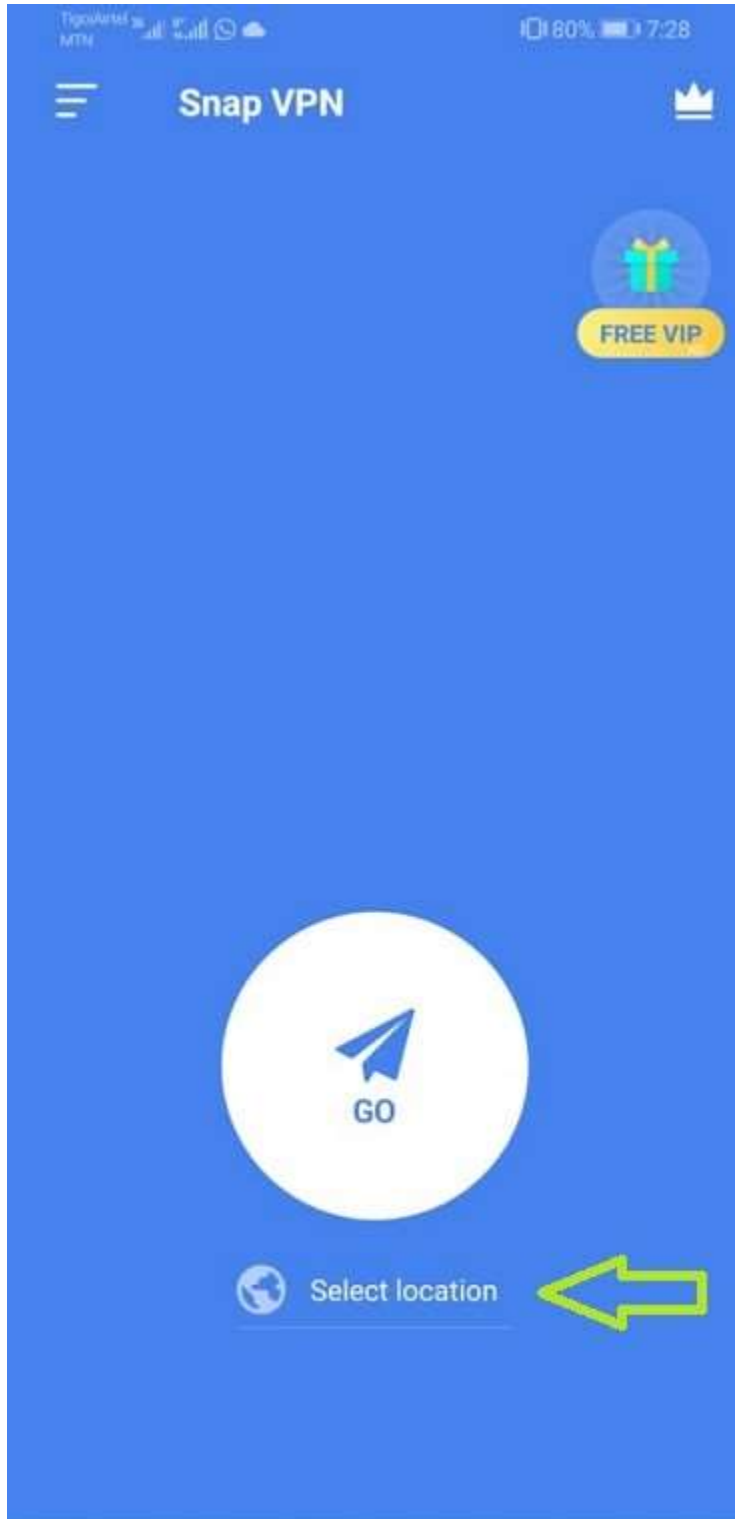

FREE VPNS ON ANDROID DEVICE

One of the best free vpn on android **is snap vpn**, even on this free Version, you can still connect to other countries apart from usa and

Still get connected, hotspot shield was very good at first but now it has cast. To open up the snap vpn, 1st go to the google playstore

- Click on select location

- Choose any country you want from below and click on go

Vpn on iphone device

On iphone, whenever i want to check something with usa vpn, i use these two main vpns:

VPN 360

WINDSCRIBE VPN

Join hackersnacks tutorials

<https://t.me/hackersnacks>

FREE VPN ON COMPUTER/PC.

However if you are on pc and would want to use a free but strong Vpn, you can use the **windscribe vpn**.

Note: it does not have all states Ip, only some of it, if you need a particular state or zip ip, you can use a paid vpn like **911 socks5** or **vip72 socks5**. Below is the step-by-step process of setting up a windscribe vpn on your pc.

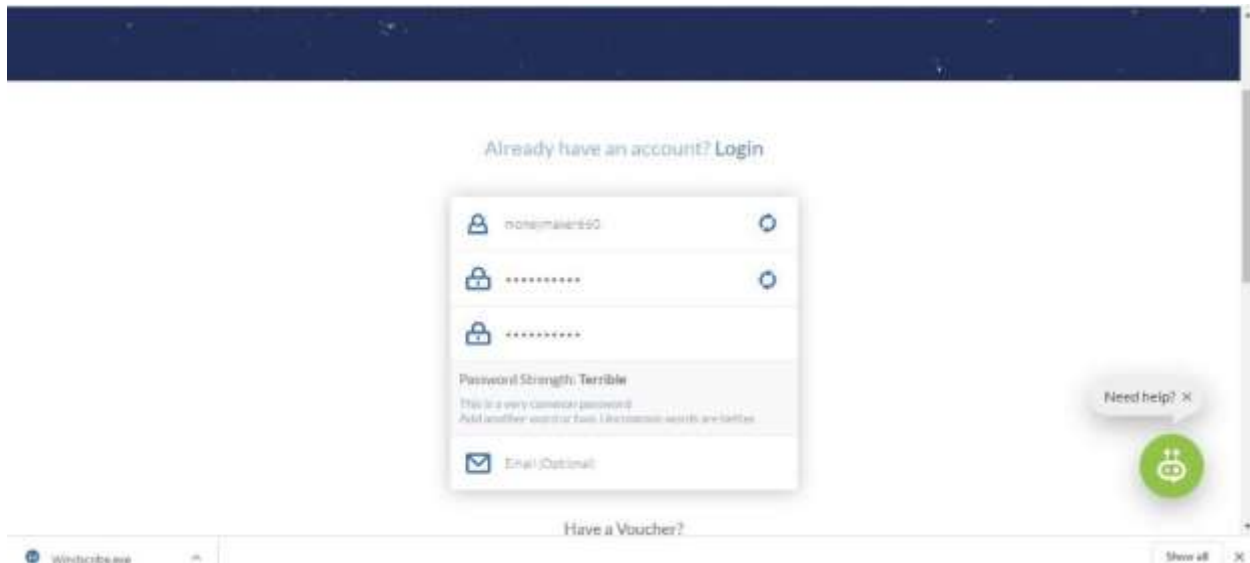

On the windscribe page, click on the tab with windows written on it as shown below to download it.

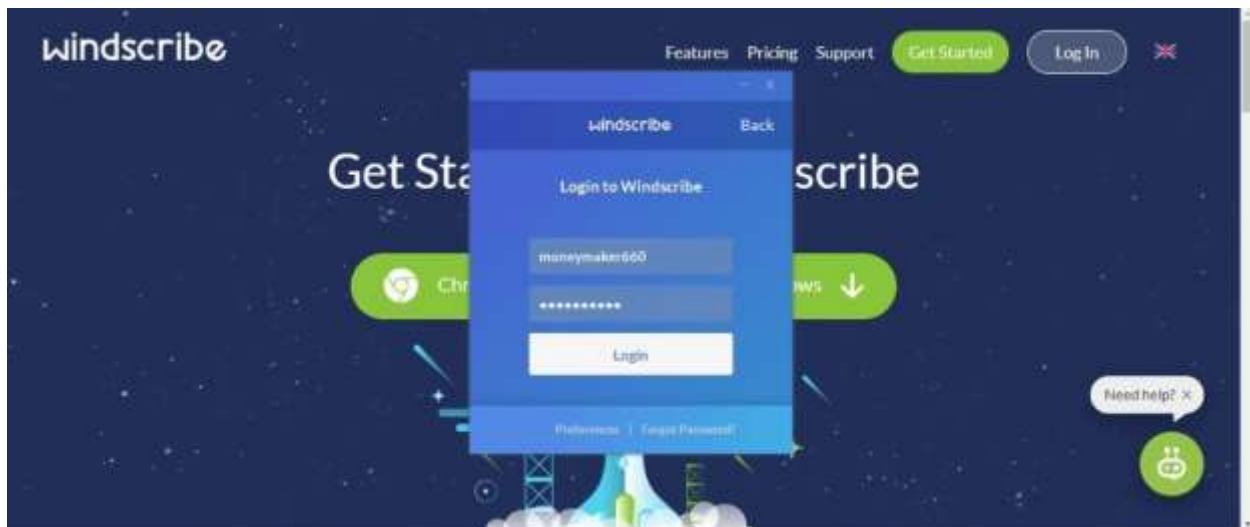

Once the software is downloaded, run it as administrator.

Name	Date modified	Type	Size
 Windscribe	01/29/2020 06:06	Application	16,504 KB

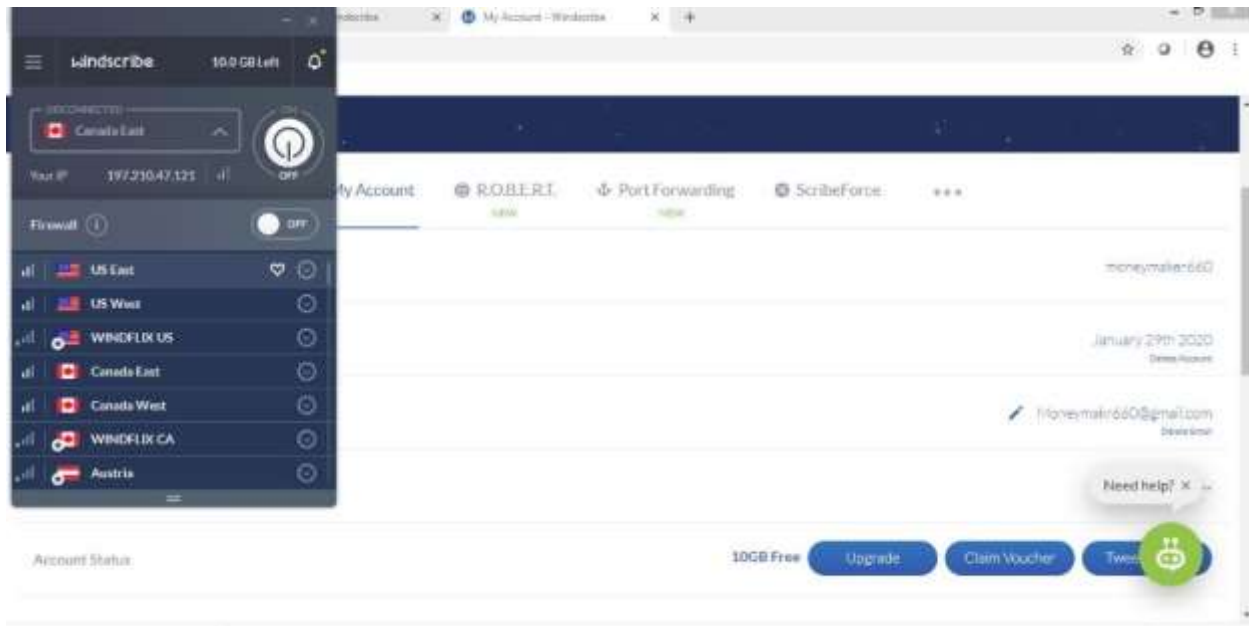

You will be asked to create a new windscribe account before it can be opened on the pc,after creating the account,make sure you go to your email and click on the verification link sent there.

ONCE THE ACCOUNT IS CREATED, YOU CAN INPUT THE LOGINS AND START TO ENJOY THE VPN .

You will be given 2gb worth of data space, but once you verify your email, it will be increased to 10gb. in the free version, you can choose some other countries too.

Now that we done with the vpn explanation, let cross out some minor differences between socks and vpn.
